Master Graph 6

The distance-time graphs below represent the motion of a car. Match the descriptions with the graphs. Explain your answers.

- Descriptions:**
- The car is stopped.
 - The car is traveling at a constant speed.
 - The speed of the car is decreasing.
 - The car is coming back.

Graph A matches description _____ because _____
 Graph B matches description _____ because _____
 Graph C matches description _____ because _____
 Graph D matches description _____ because _____

GRAPHING SPEED

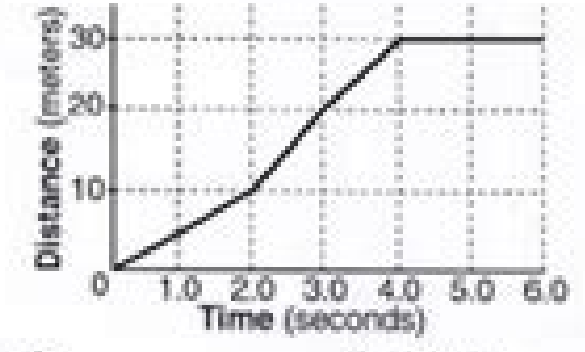

Directions: Review the information on the table below. Construct a graph of the motion of Sara and Jack using the graph on the back. Place time on the bottom horizontal axis of your graph paper and distance on the left vertical axis. Plot the data for Sara in red and the data for Jack in blue. After plotting the data and completing the line graph, study the graph to see what the data is telling you. Use the graph to answer the following questions:

Data:
 It is possible to graph the motion of an object if we know the distance the object covered and the time it took to cover the distance. The data below is for two different bicyclists, Sara and Jack.

Time in seconds	Distance in meters	
	Sara	Jack
20	15	14
40	32	29
60	48	44
80	67	62
100	88	83
120	94	98
150	102	108
180	180	138

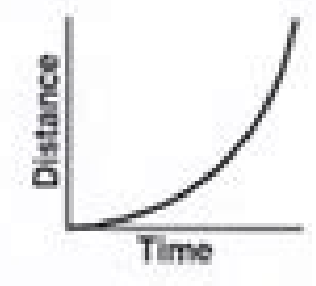

- Questions:**
- What is Sara's average speed after 60 seconds of cycling? $48/60 = 0.8 \text{ m/s}$
 - What is Jack's average speed after 60 seconds of cycling? $44/60 = 0.73 \text{ m/s}$
 - Who's average speed is greater? Sara's
 - What happened to the cyclists' speed between 120 and 150 seconds? Speed decreased
 - What may have caused this? Might be riding up hill
 - What happened to the cyclists' speed between 150 and 180 seconds? Speed increased
 - What may have happened now? Might be going down hill
 - At what point did Jack pass Sara? 120 sec

- Name: _____ **KEY**
- What is the average speed of an object that travels 6.00 meters north in 2.00 seconds and then travels 3.00 meters east in 1.00 second?
 A) 9.00 m/s
 B) 4.24 m/s
 C) 0.333 m/s
 D) 3.00 m/s
 - Which pair of graphs represents the same motion?
 A)
 B)
 C)
 D)
 - A blinking light of constant period is situated on a lab cart. Which diagram best represents a photograph of the light as the cart moves with constant velocity?
 A)
 B)
 C)
 D)
 - The distance-time graph below represents the position of an object moving in a straight line. What is the speed of the object during the time interval $t = 2.0$ seconds to $t = 4.0$ seconds?

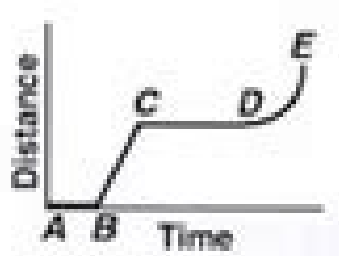

- A) 7.5 m/s
 B) 5.0 m/s
 C) 0.0 m/s
 D) 10. m/s
- 5) Which is a scalar quantity?
 A) displacement
 B) force
 C) acceleration
 D) distance
- 6) A car travels 20. meters east in 1.0 second. The displacement of the car at the end of this 1.0-second interval is
 A) 20. m/s
 B) 20. m east
 C) 20. m
 D) 20. m/s east

- 1354-1-Page 1
 Box around # means you should show work on separate paper. *style paper for this one.*
- A car travels a distance of 98 meters in 10. seconds. What is the average speed of the car during this 10.-second interval?
 A) 9.8 m/s
 B) 98 m/s
 C) 4.9 m/s
 D) 49 m/s
 - A car travels between the 100.-meter and 250.-meter highway markers in 10. seconds. The average speed of the car during this interval is
 A) 25 m/s
 B) 35 m/s
 C) 10. m/s
 D) 15 m/s
 - Distance is to displacement as
 A) force is to weight
 B) velocity is to acceleration
 C) speed is to velocity
 D) impulse is to momentum
 - A baseball pitcher throws a fastball at 42 meters per second. If the batter is 18 meters from the pitcher, approximately how much time does it take for the ball to reach the batter?
 A) 0.86 s
 B) 0.43 s
 C) 1.9 s
 D) 2.3 s
 - A person travels 6 meters north, 4 meters east, and 6 meters south. What is the total displacement?
 A) 6 m south
 B) 6 m north
 C) 16 m east
 D) 4 m east
 - The diagram below shows a graph of distance as a function of time for an object in straight-line motion.

- According to the graph, the object most likely has
 A) a decreasing acceleration
 B) an increasing speed
 C) a constant momentum
 D) a decreasing mass
- 13) The graph below represents the relationship between distance and time for an object in motion.

- During which interval is the speed of the object changing?
 A) BC
 B) CD
 C) DE
 D) AB
